MSK Direct Presents:

Breast Cancer Awareness— Knowledge is Power

Thursday, October 15, 2026 • 12:00-1:00 p.m., ET

36,000 women under the age of 45 will be diagnosed with breast cancer this year.

Learning about the signs and symptoms of this cancer and what can be done to help prevent or to find the cancer early (when it may be easier to treat) can help save lives.

Join MSK Direct for a webinar featuring Memorial Sloan Kettering Cancer Center breast oncologist Dr. Nour Abuhadra, as she answers your questions and discusses:

- The importance of regular screening
- The signs and symptoms of cancer
- How genetics and family history play a role in the risk of breast cancer
- Lifestyle changes that can help reduce the risk of cancer
